Then, it was always nice to have "extra" or "fun" music to coax them along through the tough times in their piano method books. Of course there were lots of supplemental books I could buy...Ä When music books aren't enough... Sometimes I didn't want to ask parents to spend money on yet another book, when I felt pretty sure only two or three of the pieces in the

collection would interest my student. Or maybe they need a lot for lessons. . . . I needed a source for free sheet music! It can be hard to match a student with the right arrangement Or perhaps the composition I wanted wasn't available in my student's level...and even if it was, I wouldn't find in time (think Christmas) because there was -- and still is -- no music store within a hundred miles of my town. Or I might find the piano song they wanted, but the arrangement turned out to be... BORING. Or there just wasn't any music to be found. Sometimes my students needed lots more practice with the same set of notes, but we had run out of music. Or they were ready to boogie with the 12-bar blues, but they weren't ready to read any of the blues music that I could find. If only free sheet music for kids was available. PRINTABLE sheet music. Printable PIANO music. But it wasn't! So, like many of you, I began an on-going odyssey in search of music books with a high percentage of interesting pieces... I found I enjoy arranging & setting music.... I also began to write and arrange piano music for my students, and my own kids. It wasn't exactly free sheet music then, not for me, anyway. Back then, it meant writing out music laboriously by hand on staff paper, then visiting the local copy center.Nothing could be printed at home or at my studio, unfortunately! Music notation to the rescue! But today, with a computer and great music notation software, the music score became a pleasure to write. Why are you going to all this work? My students. I had a young pianist whose favorite play was the Canon of Pachelbel in D. I knew that he would go to the city if he could attack the Canon, climb passages and everything, arranged in the key of C at a suitable level of difficulty for him... And that's what happened. Some of my PROFESSIONAL STUDENTS LOVE OPERA, but has very young and undeveloped voices to sing the songs in the original keys. Like the beautiful central part of the Flower Duct... With my shorter and lower versions of some classical vocal music, they can still experience the beauty of great vocal music and familiarize themselves with the classic repertoire, although they are young. I can also offer them popular and ethnic music that can be impossible to find! Guitar students weren't playing very fun things... My STUDENTS GUITING NECESSES EXTRA MATERIAL - beautiful and fun music - to get them out of their one-size-fits-all guitar method books, trying different playing styles and learning how chords work. And his understanding was not firm... In addition, many beginner guitar method books start with eighth notes, assuming that students can already read music. I want all of my students to have a solid base count, and we're not guessing when it comes to eighth grades... then we wait a little with them. No, I didn't turn the bad eyes off. They form the backbone of my piano, violin and guitar lessons. And I also buy additional books for my students. More and more, there are fantastic collections of repertoire and available soils. Some of them can be viewed online to measure their suitability for their students. I'd like to share my favorites with you. odnavel odnavel.artxe oriehnid odnezaf EMOH-A-ATSE ED ERTNERAP mu ,essalc ariemirp ed rosseforp mu ©Á ÁcoV !lanoicida acisÁAm ed arucorp Á rosseforp mu ©Á ÁcoV pupils, or a college student just beginning to teach?
